PROJECT NAME

Haven Stage 2

LOCATION

West End, Townsville

ROLE

Principal Contractor

COMPLETED

July 2017

CLIENT

Ellis Developments Pty Ltd

PROJECT VALUE

Commercial-In-Confidence

PROJECT OVERVIEW

Haven, located 3km from Townsville's CBD provides access to an urban lifestyle and huge array of options that are unique to its location including major retail centres and home to a range of services and community facilities.

Appointed as Principal Contractor, Hansen Constructions NQ delivered Stage 2 (24 lots) of civil and landscaping subdivisional works including soil erosion and sediment control, bulk earthworks, roadworks, stormwater drainage, water and sewer reticulation, street light pole footings and installation of conduits for electrical and telecommunications.

Included in the scope of works was the development and implementation of a Vegetation Protection Plan to protect the wilderness corridor connecting to Mundy Creek. With Mundy Creek a direct tributary to Cleveland Bay and the Great Barrier Reef Marine Park Area, ensuring that the highest adherence to this plan and soil erosion and sediment control by Hansen Constructions NQ's team and subcontractor during the course of the project was essential to the success of this project.

Steve Ellis, Managing Director for Ellis Developments Pty Ltd, states "... please pass on my thanks to David and the team that dealt with HAVEN - looks great, a job well done. Many thanks for the speed and professionalism on site."
